

Color ME

RATS AND MICE hate it when their house is dirty. Make sure to clean your pet's cage at least once a week. Wash it out and fill it with fresh bedding. Never use cedar or pine shavings though...they'll make your rat or mouse sick. Good things to use instead are aspen shavings, CareFRESH™, and Gentle Touch™.

It's very important to always have clean water and fresh food for your pet. If they don't have these things they can get sick. Check your rat or mouse's food and water every day to make sure they have plenty.

The best way to give your pet water is with a water bottle. You can buy these bottles at the pet store. Don't give your rat or mouse water in a dish. The water will get dirty, and your pet will get wet!

There are lots of different kinds of food for rats and mice. The best kind is called Lab Blocks. Make sure that your rat or mouse always has a bowl full of food that's made just for them.
