

Color ME

RATS AND MICE love special treats. Some of their favorites are things that I bet you like too! Just remember, rats and mice have little tiny tummies. Don't give them too many treats, it'll spoil their dinner.

Fruit is a great treat. Rats and mice love to eat apples, bananas, peaches, strawberries, and grapes. They also love vegetables like carrots, celery, cucumbers, beans, and broccoli. Which ones do your critters like best?

Rats and mice love to eat lots of other strange things too. Spaghetti noodles with sauce, pizza, wheat bread, and even breakfast cereal. Anything that's good for you to eat is probably good for your critter too.

Junk food is a no no! Rats and mice can get sick from eating junk food even though they love the taste. Never let your critter eat candy, cookies, chips, soda, gum, chocolate, or cheese. If it's not good for you, it's not good for your pet.
