

BABY MOUSE DEVELOPMENT

Newborn

They are bright pink and you can see they will have black eyes. Their eyes and ear canals are sealed. The light spot on their left side is a tummy full of milk.

2 Days

The babies are showing color pigment and have clearly grown in size and weight.

6 Days

Their coats are coming in. These are all Silver Dove.

BABY MOUSE DEVELOPMENT

12 Days

They opened their eyes today.

16 Days

They are running around the cage now. The babies are eating a variety of foods but still rely on mom for milk.

4 weeks

They are weaned from mom and pet shop mice will need to be separated by sexes at this age.

5 Weeks

They are now ready for new homes. The big English Show mice will need to be separated by sexes between 5 and 6 weeks of age.
